

Additional Items That Can Be Recycled in NCR via Contract Vehicles

Items that are collected by outside vendors or other GSA offices:

- **eWaste** (computers, machinery, all electronics) – contact local either GSA IT or FAS or your building manager to collect and properly dispose of/donate; depends on who owns the item. First ask IT.
- **Construction & demolition debris** – the recycling of C&D debris should be included in all projects' contracts! This is a GSA requirement and is tracked in ePM/gBUILD.
- **Universal waste** (light bulbs, ballasts) – each building manager's office collects and disposes of these items; contact your building manager to properly dispose of these items
- **Furniture** – contact FAS to properly dispose of furniture
